

Proof of Concept (POC) Document

Feature: Employee Vertical Carousel with Modal View

Project: Start_up_CRM

1. Objective

To design and implement a vertical auto-scrolling employee carousel in Angular where employee blocks scroll upward continuously and display details in a modal when clicked.

2. Functional Requirements

- Display employee cards in vertical layout.
- Auto-scroll upward continuously (infinite loop).
- Pause animation on hover.
- Click employee block to open modal.
- Modal displays Name, Designation, Department, Email, Phone, and Image.

3. Technical Stack

- Frontend: Angular
- Styling: SCSS
- Animation: CSS Keyframes
- Modal: Custom Angular Modal
- Data Source: Static JSON (POC Stage)

4. Sample Angular Component (TypeScript)

```
export class EmployeeCarouselComponent {
  employees = [
    { name: 'Rahul Sharma', designation: 'Frontend Developer' },
    { name: 'Anjali Verma', designation: 'HR Manager' }
  ];

  selectedEmployee: any = null;

  openModal(emp: any) {
    this.selectedEmployee = emp;
  }

  closeModal() {
    this.selectedEmployee = null;
  }
}
```

```
}  
}
```

5. Expected Output

- Vertical infinite scrolling employee blocks.
- Pause on hover functionality.
- Click to open employee detail modal.
- Clean and modern CRM UI.
- Ready for Spring Boot backend integration.
